Published / Filed: **Nov. 22, 2001 / Feb. 1, 2001**

Application Number: **WO2001WO0001082**

IPC Code: **G01D 5/39**;

ECLA Code: **G01D5/39**;

Priority Number: **Feb. 5, 2000 [DE2000010005213](#)**

Abstract:

According to the invention, the parameters are measured using conventional measuring devices, especially analog measuring devices, whereby the measured variable is visualized on a display. The display is detected using a digital camera. The detected image is digitized and sent to an evaluation unit, for example via the Internet. Said measured variable is reconstructed and displayed in the evaluation unit using a pattern recognition software. The use of a camera also makes it possible to simultaneously monitor several displays or the surrounding area of the display.
